International Conference on IC³I 2018 focuses on issues of contemporary interest in computing and informatics. Developments in the field of computing and informatics are very complex and advances are so rapid, changes are occurring on day to day basis. The main objective is to promote a high level of interaction among stakeholders in theoretical, experimental, and applied concepts in the field of computing and informatics.

Prospective authors are requested to submit their papers in not more than 6 pages, prepared in the two column IEEE format. The major topics of the conference include, but are not limited to:
